Education

- 2011-2015 **École polytechnique fédérale de Lausanne (EPFL)**, Lausanne, Switzerland
Ph.D. in Electrical Engineering
Thesis: “Sparsity-driven Statistical Inference for Inverse Problems”
Advisor: Prof. Michael Unser
- 2008-2011 **EPFL**, Lausanne, Switzerland
M.Sc. in Communication Systems
Thesis: “Optimal Quantization for Compressive Sensing with Relaxed Belief Propagation”
Advisors: Prof. Vivek Goyal (MIT) and Prof. Martin Vetterli (EPFL)
- 2005-2008 **EPFL**, Lausanne, Switzerland
B.Sc. in Communication Systems
- 2007-2008 **Carnegie Mellon University**, Pittsburgh, PA, USA
Exchange Student in Electrical and Computer Engineering (ECE)

Research and professional experience

- 2017-present **Washington University in St. Louis (WUSTL)**, St. Louis, MO, USA
Assistant Professor of Computer Science and Electrical Engineering
• Group leader of Computational Imaging Group (CIG).
- 2015-2017 **Mitsubishi Electric Research Laboratories (MERL)**, Cambridge, MA, USA
Research Scientist in Computational Sensing.
• Computational sensing and imaging. Multimodal imaging.
- 2011-2015 **EPFL**, Lausanne, Switzerland
Research Assistant in the Biomedical Imaging Group (BIG)
• Learning Tomography. Compressive imaging methods.
- 2013 **Stanford University**, Stanford, CA, USA
Visiting Student Researcher in the Information Systems Lab (ISL)
• Statistical inference with Belief Propagation.
- 2010-2011 **Massachusetts Institute of Technology (MIT)**, Cambridge, MA, USA
Visiting Student in the Research Lab of Electronics (RLE)
• Message-passing algorithms for Compressive Sensing. Single-pixel imaging.
- 2009 **Microsoft Corporation**, Zurich, Switzerland
Intern
• Software development for distributed communication systems.

Honors and awards

- 2016 EPFL Doctorate Award 2016 finalist.
- 2015 Featured in Nature “News & Views” (Nature, Vol. 523, Iss. 7561, p. 416, 2015).
- 2013 Member of team that received Education Award from Life Sciences Department of EPFL.
- 2011 Ph.D. fellowship from the School of Computer and Communication Sciences at EPFL.
- 2007 EPFL Study Abroad Scholarship for Carnegie Mellon University, Pittsburgh, PA, USA.

Current research focus: My research focuses on the advancement of computational imaging. Specifically, my goal is to leverage the advances in optimization, machine learning, and statistical inference to design new models, algorithms, and systems for imaging. My work is inherently interdisciplinary and has broad applications in biomedical imaging, defense, physical science, and industrial inspection. I extensively collaborate with researchers in optics, medicine, biology, as well as with those working in industry.

Broader areas of expertise: Signal and image processing. Sparse regularization and compressive sensing. Traditional and convolutional sparse representations. Tomographic imaging. Multimodal imaging. Inverse problems. Statistical inference. Large-scale optimization algorithms. Belief propagation and message passing.

3. Introduction to Object Oriented Programming: Autumn 2008
4. Introduction to Communication Systems: Autumn 2007

Professional activities and service

Professional societies

- Institute of Electrical and Electronics Engineers (IEEE)
 - Student Member (2011–2015)
 - Member (2015–present)

Professional activities and service (cont.)

Professional societies

- Optical Society of America (OSA)
Member (2017–present)
- Sigma Xi
Member (2014–present)

Associate editor

- SPIE Journal of Electronic Imaging (2017-present)

Technical committees

- IEEE Special Interest Group (SIG) in Computational Imaging
Member (2016–present)

Special session organization at conferences:

- “Large-Scale Computational Imaging with Wave Models,” with Prof. Laura Waller and Dr. Brendt Wohlberg at IEEE ICASSP 2017.

Reviewer for journals

- OSA Optica
- IEEE Transactions on Computational Imaging
- IEEE Transactions on Image Processing
- IEEE Transactions on Signal Processing
- OSA Journal of the Optical Society of America A
- IEEE Signal Processing Letters
- IEEE Transactions on Medical Imaging
- Elsevier Signal Processing
- IEEE Journal of Biomedical and Health Informatics
- IEEE Journal of Selected Topics in Signal Processing
- SIAM Journal of Imaging Science
- OSA Optics Express

Reviewer for conferences

- IEEE ICASSP 2017 (area chair)
- IEEE ICIP 2017
- ICCP 2017 (program committee)
- IEEE ISIT 2015, 2017
- IEEE ICME 2016
- NIPS 2014, 2015
- IEEE CAMSAP 2015
- IEEE ITW 2014
- IEEE ICASSP 2012
- IEEE ISBI 2012

Other experiences

- Maintains the research blog: “Postscriptum...” at <http://kamilov.info/blog>.
- Student representative for Communication Systems Department at EPFL for 2008–2011.
- Founded an educational consultancy company “G.e.P. Solutions” in 2010–2013.
- Committee member of Erasmus Student Network chapter of EPFL in 2009.
- Member of the coaching team for new undergraduate students at EPFL in 2009.

Language skills

- English, French, German, Russian, and Uzbek.

Biography

Ulugbek S. Kamilov is an Assistant Professor and Group Leader of Computational Imaging Group (CIG) at Washington University in St. Louis. Prof. Kamilov obtained his B.Sc. and M.Sc. in Communication Systems, and Ph.D. in Electrical Engineering from the École polytechnique fédérale de Lausanne (EPFL), Switzerland, in 2008, 2011, and 2015, respectively. In 2007, he was an Exchange Student at Carnegie Mellon University (CMU), Pittsburgh, PA, USA, in 2010, a Visiting Student at Massachusetts Institute of Technology (MIT), Cambridge, MA, USA, and in 2013, a Visiting Student Researcher at Stanford University, Stanford, CA, USA. From 2015 to 2017, Prof. Kamilov was a Research Scientist at Mitsubishi Electric Research Laboratories (MERL), Cambridge, MA, USA.

Biography (cont.)

Prof. Kamilov's main research area is computational imaging with an emphasis on the development of computational methods for biomedical and industrial applications. He has a strong interest in image reconstruction, compressive imaging, convex and nonconvex optimization, machine learning, and statistical inference. He has co-authored over 19 journal and 36 conference publications in these areas. His work on Learning Tomography (LT) was selected as a finalist for EPFL Doctorate Awards 2016 and was featured in Nature "News and Views." Prof. Kamilov is a member of IEEE and OSA. He is currently serving his first term as a member of IEEE Special Interest Group on Computational Imaging. He is also currently serving as an Associate Editor for the SPIE Journal of Electronic Imaging. He served as Computational Imaging area chair for IEEE Int. Conf. Acoustics, Speech and Signal Process. (ICASSP 2017) in New Orleans, LA, USA. He has also co-organized a special session on "Large-Scale Computational Imaging with Wave Models" at ICASSP 2017.
